

BUILDING VALUE IN PARTNERSHIP WITH MANAGEMENT

The Palladium team is dedicated to building value for our portfolio companies, our managers and our partners through the implementation of best-in-class practices in strategy, operations and the financial area.

We work closely with management teams, combining their deep industry knowledge with the strategic perspective and financial acumen of our investment team and the industry experience of our operating executive network. With extensive investment experience across industries, business cycles and stages of corporate development, we have the ability to guide our portfolio companies toward sustained growth and profitability.

We entrust the day-to-day business execution to our portfolio companies' management teams, while we serve as

an advisor and sounding board in a variety of functions such as strategic planning, business development, governance, human resources, financing and mergers & acquisitions. With the participation of our senior investment professionals on our companies' boards of directors, we provide our portfolio with direct access to extensive expertise and resources within our firm and to our wide network of entrepreneurial, corporate, financial and public policy experts. Through periodic reviews and board meetings, we identify and take action proactively to address business opportunities, liquidity and performance.

While each investment is unique, our approach remains consistent: partner with outstanding management teams to create long-term equity value.

Palladium Equity Partners is one of the largest Hispanic-led private investment firms in the U.S. The Firm was founded in 1997 and currently manages over \$1 billion of committed capital. Palladium seeks to acquire and grow companies in partnership with experienced management teams, with a special focus on companies benefiting from the growth in the U.S. Hispanic population.

U.S. HISPANIC INVESTMENT THEME

In targeting the U.S. Hispanic market and identifying companies for possible investment, we look to capitalize upon investment themes such as youth and family, underserved industry sectors, culturally targeted products and the overall Hispanization of the U.S. society. We focus our investments on opportunities in which we have a significant competitive advantage, including: companies selling to Hispanic consumers, Hispanic-owned companies, businesses leveraging Hispanic products and services into the mainstream market and international companies looking to enter and expand U.S. operations. Given our unique Hispanic market focus and network, we can assist companies and our management partners in approaching this segment more effectively and profitably.

The U. S. Hispanic market exhibits favorable characteristics for private equity investing, including a young, fast-growing population that fuels growth in consumption and business formation. Hispanics are the largest U.S. minority group, representing more than 45 million people or over 15% of the U.S. population. Over the last decade, this group has grown significantly, with growth outpacing general U.S. population growth by over five times and accounting for 50% of overall U.S. population growth since 2000. The buying power of the Hispanic population now exceeds \$1 trillion - one out of every ten dollars of U.S. buying power. The combined purchasing power of the U.S. Hispanic population ranks it among the world's largest economies, and its population is the fourth largest when compared to Spanish speaking countries world-wide.

INDUSTRIES

TARGETED AREAS

INVESTMENT CRITERIA

Our principals have a longstanding track record investing in sectors including business & financial services, food, healthcare, manufacturing, media & telecom and retail. We have a particular focus and expertise in investing in companies that are well-positioned to capitalize on the fast-growing U.S. Hispanic market.

Our investments may include mature, stable businesses that require a strategic business partner to achieve the next level of performance, young companies seeking operating insight and capital to achieve their growth potential or underperforming companies in need of operational and financial restructuring to unlock the intrinsic value of the enterprise.

Transactions include leveraged buyouts, recapitalizations, corporate spin-outs, growth financings and restructurings, usually representing an equity investment of \$15 - 75 million. We execute smaller transactions in particularly attractive opportunities and larger investments in collaboration with co-investors.
